

Together2Goal[®]

AMGA Foundation
National Diabetes Campaign

Monthly Campaign Webinar

February 18, 2021

Today's Webinar

- Together 2 Goal® Updates
 - Webinar Reminders
 - AMGA 2021 Annual Conference
 - Virtual Diabetes Specialty Clinic (VDiSC)
- Together 2 Goal® Group Success Stories
 - Kristine Mendez of Scripps Health
- Q&A
 - Use Q&A or chat feature

Webinar Reminders

- Webinar will be recorded today and available the week of February 22
 - www.Together2Goal.org
- Participants are encouraged to ask questions using the “Chat” and “Q&A” functions on the right side of your screen

AMGA 2021

Annual Conference

VIRTUAL EVENT

April 20-22, 2021

amga.org/AC21

▶ SHARED LEARNING

Real-world case studies and insights from AMGA members, including Intermountain Medical Group, Palo Alto Medical Foundation/Sutter Health, Lehigh Valley Physician Group, and many others

▶ ENGAGING TOPICS

Three days, three topics that address today's most critical issues:

- Innovations in Health Care
- Patient Care and Experience
- Organizational Resiliency

▶ INSPIRING KEYNOTES

Hear from:

- Futurist Dr. Peter Diamandis
- Google Health's Dr. David Feinberg
- Viral sensation ZDoggMD
- Cityblock's Dr. Toyin Ajayi, and more

Virtual Diabetes Specialty Clinic (VDiSC)

Year-long study that will assess the feasibility and efficacy of establishing a virtual diabetes clinic

Will focus on the introduction and ongoing use of CGM technology

Will provide patient education and support as well as CGM materials

Learn more at <http://www.jaeb.org/vdisc>

VDiSC

A one-year Virtual Diabetes Specialty Clinic study exploring how telemedicine can help adults with diabetes

Adding continuous glucose monitoring (CGM) to your diabetes care plan may help to improve your blood glucose. A CGM measures your blood sugar. As part of this study, you will work with a virtual clinic team without a visit to the doctor's office.

If you are interested in learning more, please visit www.jaeb.org/vdisc

What to expect:

- A CGM and other supplies to be provided by the study
- Virtual visits - CGM training and support from the comfort of home
- Care coordination - communication between the virtual clinic team and your health care provider

You may be eligible to participate if you:

- Are at least 18 years old
- Have type 1 or type 2 diabetes
- Use insulin daily (at least 3 daily injections or an insulin pump)
- Have not used a CGM in the last year
- Use an Android or iOS smartphone and have access to a computer with internet

Today's Featured Presenters

T2G Campaign Planks

CAMPAIGN PLANKS

Empower Patients

Build an Accountable Diabetes Team

Integrate Emotional & Behavioral Support

Refer to Diabetes Self-Management Education and Support Programs

Improve Care Delivery

Conducting Practice-Based Screening

Adopt Treatment Algorithm

Measure HbA1c Every 3-6 Months

Assess and Address Risk of Cardiovascular Disease

Contact Patients Not at Goal & with Therapy Change within 30 Days

Leverage Information Technology

Use a Patient Registry

Embed Point-of-Care Tools

Publish Transparent Internal Reports

Governance

- Primary Care Preventive Workgroup
 - Healthy Planet (aka Information Services)
 - Quality
 - Medical Group Physicians
 - Operations Leaders
- “Model Practice” Workgroup
 - Rapid cycle care team(s) that experiment with new workflows to develop standard work and spread
- Alignment to our Quality sub-committee of the board for strategic and operational priorities

Utilizing Technology in the Improvement Cycle

During the Visit – Health Maintenance

Criteria: Patients on the Diabetes Mellitus Registry will have the following topics automatically loaded into Health Maintenance (HM).

📅	9/20/2018	Diabetes Foot Exam	1 year(s)
📅	9/20/2018	Diabetes Hemoglobin A1C	1 year(s)
📅	9/20/2018	Diabetes Eye Exam	1 year(s)
📅	9/20/2018	Diabetes Urine Microalbumin	1 year(s)
📅	9/20/2018	Diabetes LDL	1 year(s)

Health Maintenance Criteria: Patients on the Diabetes Mellitus Registry will have the following topics automatically loaded into Health Maintenance (HM).

1. Patient ≥ 18
2. Is on Registry (SMF Diabetes Registry)
3. Patient has NO active diagnosis of Gestational Diabetes
4. Criteria for excluding patients from foot exam, eye exam, A1C, LDL, and Microalbumin modifiers. Example: Diagnosis of Amputation or Not a Candidate for Microalbumin modifier

During the Visit – Best Practice Advisories

 This patient's blood pressure is greater than or equal to 140 (systolic) or greater than or equal to 90 (diastolic). Click on the hyperlink below to document 2nd blood pressure. Reminder: Take 2nd BP after waiting as long as possible, preferably several minutes per standard rooming process.

Patient Refused Medical Reasons

During the Visit: Lessons Learned

- Explain the why and impact to patient and provider
- Experiment on small group, refine, then spread
 - Takt time is important!
- Ensure right place and right time (aka appropriate visits)

Non-Visit Work – Gap Closure Outreach

- “Whole patient” approach, not just diabetes
- Support staff run report in EMR
- Sort by Highest Gap
- Conduct outreach via phone or portal
- Track outreach with status (complete, left message, declined, etc)

SH My Panel Metrics Patient Search [7280437] as of Wed 2/10/2021 3:23 PM

Filters Options Chart Communication Add to List Appts

Detail Care Gap Score Summary

			2		SCCR INTERNAL MED	07/29/2019	X						

5 Optimal Diabetes Care Control Bundle Score

Any score less than 6 indicates a gap in diabetes control. A patient receives a point for each portion of the diabetes control score they are currently meeting.

High Risk

Points Factor	Value
0	Systolic Blood Pressure 155/90
1	Systolic Blood Pressure 6/15/2020
	Diastolic BP 6/15/2020
1	Hemoglobin A1c 5.9
1	Hemoglobin A1c 6/12/2020
1	LDL 97
	Prescribed statins No
1	Diabetes Composite Component - Nephropathy Screening 1
	Urine microalbumin 7.5 (6/12/2020)

Care Gap Report

- ✘ BP Control
- ✔ A1c Control
- ✔ Nephropathy Screening

✔ A Green check indicates the patient is meeting the measure

✘ A Red "X" indicates the patient is not meeting the measure

Non-Visit Work: Lessons Learned

- Standard work must be followed for process to be effective
- Carve out time for assigned staff to complete their work
- Focusing on patients with highest gap score can create unintended slip in performance at the individual metric level

Monitoring & Feedback Gap to Goal Outreach

Target (Blue Line) - Data point illustrates what max gap should be that week to still achieve goal by Year End

Actual (Red Line) - Actual number of gaps remaining to achieve target at the close of the week. If actual gap is 0 then target has already been achieved. Green Star will indicate this.

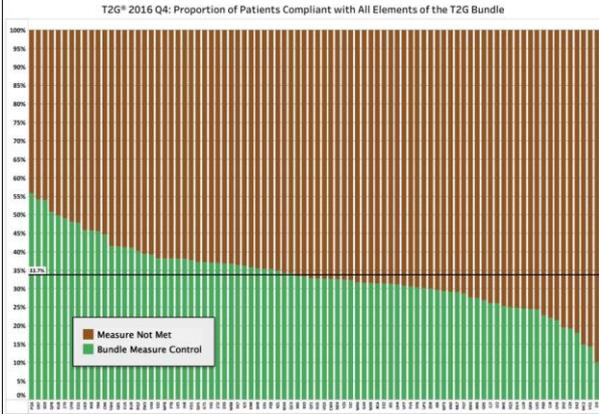

Monitoring & Feedback: Lessons Learned

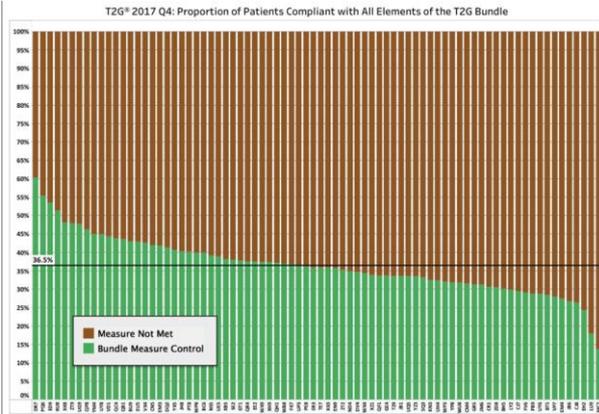

- Transitioning from a push model to a pull model takes time.
- Continuous improvement to monitoring and feedback reports – what worked last year may not be effective this year
- Target setting can be an art form.
